## AMAZING NEW PROCESS INSPIRES CREATIVES TO 'PAINT WITH FIBERS'

**MuseAbles™ Artsy Fiber Kits Available in Fine Knitting Stores Now;  
Will Debut at January's TNNA Show in San Diego**

What do you get when you combine the finest yarns and fibers with a soluble film and a creative mind? A one-of-a-kind wearable, displayable piece of art ~ a **MuseAbles** to be exact!

**MuseAbles** ~ the newest trend in fiber arts ~ is the wholesale distributor of 'artsy fiber kits' which inspire creators to tap their inner muse, and use yarn and other fibers in a fun and innovative way to produce dazzling masterpieces.

Each kit includes well designed combinations of fibers in irresistible color schemes, the soluble film that holds the project together, the thread that laces through the fibers, and crystal-clear instructions.

"We are thrilled to be able to bring this amazing process to the public for the first time," says Terre Short, **MuseAbles** Director of Creativity. "Our kits are designed to offer the beginning fiber artist an easy way to create a unique piece of art, with stunning results the first time. We also see **MuseAbles** as the natural next step for seasoned knitting enthusiasts seeking another outlet for their love affair with fine fibers," Short continued.

Currently, two basic **MuseAbles** kits are available, in three exciting color schemes. The large kit will enable the creator to produce one "Museum Wrap" or an "Objet d'Art" of their musings. The smaller version provides inspiration for embellishments of the home, such as table runners (long or round) "Runway Runners," an "Objet d'Art," or fashion art such as a "A Sculpted Scarf."

If you are looking to attract new customers and expand the products you currently offer your loyal customers please give us a call at **MuseAbles** and let us show you how fun and profitable these kits can be. **Please visit us in San Diego at the TNNA Show in January. We will have **MuseAbles** showcased in the New Product Area, and will be hosting live demonstrations at Booth #2137.** We look forward to seeing you there! In the meantime, we invite you to wander throughout our virtual studio at [www.museables.com](http://www.museables.com) and muse a bit about the possibilities.
